

**Tricor Industrial, Inc**  
**Open Position**  
**Estimator/Project Manager**  
**Fabrication Division-Conroe, Texas**

Growing company looking for an experienced estimator/project manager for an important highly visible position for a Specialty Metals Fabricator.

Tricor Metals is an ASME fabrication facility which specializes in the fabrication of titanium, zirconium, tantalum and nickel alloy pressure vessels, heat exchangers, and piping systems. Our facility in Conroe is air conditioned and state of the art.

The functions of this position will include but not limited to:

- Prepare estimates from established guidelines/standards.
- Prepare quotations for fabricated products and submit to customers.
- Assist outside sales persons as necessary during customer evaluation phase of quotation.
- After award of purchase order from customer, enter the order electronically.
- Manage the project from order entry to shipment.
- Prepare and submit Change Order Requests as necessary in order to cover customer requested changes and modifications.

Excellent communication and computer skills, plus proficiency in Excel required. Engineering degree a plus.

If your qualifications match the Essential Functions above and you are interested, please submit resume to Human Resources.
